

Guideline for Electronic Submission

(also available at http://www.fujipress.jp/IJAT/IJAT_authors.html)

Please return your final, revised manuscript on disk as well as hard copy.

The hard copy must match the disk.

The International Journal of Automation Technology advises authors to deliver the final, revised version of their accepted manuscripts (text, tables, and illustrations) on disk in order to promote quick publication. We anticipate that providing a disk will be convenient for you, and it carries the added advantages of maintaining the integrity of your keystrokes and expediting typesetting. Please return the disk submission slip below with your manuscript and labeled disks.

In case to deliver manuscripts as attached files of e-mail, please add disk submission form below.

Text

Storage medium: CD, 3-1/2" high density disk in IBM MS-DOS, Windows format, or attached files of an e-mail.

Software and format: LaTeX format or Microsoft Word document is preferable, although manuscript prepared with any other processor is acceptable.

International Journal of Automation Technology will style your manuscript according to the Journal design specifications. So please refrain from complex formatting. Do not use desktop publishing software such as Page Maker or Quark Express. If you prepared your manuscript with one of these softwares, export the text to ASCII format.

File name: Submit text and tables of each manuscript as a single file. Text file should be given the three-letter extension that identifies the file format. Macintosh users should maintain the MS-DOS "eight dot three" file naming convention.

Labels: Label all disks with your name, the file name, and the word processing program and version used.

Illustrations

Storage medium: Submit as separate files from text files, on separate disk. In case of CD, all can be

contained on a CD.

Software and format: All illustration files should be in TIFF, or JPEG. Format EPS with preview are acceptable. Do not submit native application formats.

Resolution: Journal quality reproduction will require gray scale and color files at resolution yielding approximately 360dpi. Bitmapped line art should be submitted at resolution yielding 600dpi or more. These resolutions refer to the output size of the file. If you anticipate that your image will be enlarged, or reduced, resolution should be adjusted accordingly.

File name: Illustration files should BE GIVEN the 2 or 3 letter extension that identifies the file format used (i.e. tif, jpg or eps).

Labels: Label all disks or CD with your name, the file names, format, and compression schemes (if any) used. Hard copy must accompany all files.

Author's Name _____ E-mail address _____

Manuscript code number _____ Type of computer _____ Program(s) & version used _____

Iselleous: _____

I certify that the material on the enclosed disk(s) is identical in both word and content to the printed copy herewith enclosed.

Signature- _____ Date _____
