: This is the seventh symposium organized by Waseda Management Engineering Research Group to discuss on the present state of arts of "Management Engineering." The symposium is held for promoting researches on the management engineering. The management engineering was renamed from "Industrial Engineering" where the strength is placed on management as well as production in industrial engineering fields. Since Fuzzy Sets were proposed by Lotfi A. Zadeh, the research of fuzzy systems has been done very widely and rapidly. Today, the concept of fuzzy systems is merged and

fusion with various concepts and technologies. The Intelligent Computing is intending to employ such methods to deal with words. The symposium is concerning with rather wide range including organization, corporate strategy, project management, management of technology, as well as intelligence, computation, operations research, probability and possibility theories, fuzzy sets, rough sets, approximate reasoning, linguistic information processing and automata, knowledge discovery, clustering and data analysis, fuzzy control and modeling, optimization under uncertainty and its applications, games and decision making, fuzzy analysis, and fuzzy game. We are welcoming all participants to attend and present recent results and discuss on management engineering from the perspective of soft and innovational computing.

### Management Engineering to Bridge Gap between Human & System

<b>Keynote Speech</b>	<b>Dr. Witold Pedrycz</b>	Prof. University of Alberta, Canada
<b>Keynote Speech</b>	<b>Dr. Kaoru Hirota</b>	Prof. Tokyo Institute of Technology, Japan
<b>Keynote Speech</b>	<b>Dr. Mika Sato-Ilic</b>	Associate Prof. The University of Tsukuba

### ✓ Submission of your paper

Important Date	Deadline	Note
Invited Papers	1 July 2010	Pages 6 to 10
General Papers	1 July 2010	Pages 4 to 8
Acceptance Notification	10 July 2010	
Camera-Ready Papers	15 July 2010	

### ✓ Submission to
