

# Keyword Index of Journal of Robotics and Mechatronics Volume 16

- 2DOF controller . . . . . 319  
=2.8mm microlaser . . . . . 122
- A**
- accurate bearing angle . . . . . 44  
actuator . . . . . 327  
actuators . . . . . 208  
adaptive behavior . . . . . 411  
adaptive control . . . . . 54,90  
air cavity . . . . . 304  
analog IC implementation . . . . . 397  
ankle. . . . . 23  
applications . . . . . 346  
arterial wall impedance . . . . . 138  
articulated body . . . . . 286  
attitude control. . . . . 319  
automated calibration . . . . . 535  
autonomous distributed system  
(ADS) . . . . . 163  
autonomous mobile robot . 217,587  
autonomy . . . . . 626  
AW-PJ robots . . . . . 293
- B**
- beckoning . . . . . 17  
bi-articular muscle . . . . . 643  
biologically-inspired approach . 397  
body holding device . . . . . 464  
book extraction . . . . . 264
- C**
- carbon nanotubes. . . . . 155,597  
central pattern generator . . . . . 397  
chair-desk . . . . . 464  
chaotic neural network . . . . . 411  
cluster robot . . . . . 278  
coded difference . . . . . 17  
color discrimination . . . . . 535  
computer-controlled . . . . . 122  
connected differential mechanism 23  
contact task . . . . . 374  
container . . . . . 186  
continuum robots. . . . . 604  
conveyance system . . . . . 163  
coupled vibration. . . . . 426  
crosstalk . . . . . 587
- D**
- dead-reckoning. . . . . 404  
decentralized control . . . . . 271  
digital signal processing . . . . . 200  
discrete time system . . . . . 54
- distributed controller . . . . . 194  
distributed sensing . . . . . 186  
DP matching . . . . . 17  
dual arm posture . . . . . 635  
dual manipulator system . . . . . 31  
dynamic stability . . . . . 434  
dynamic switching capability  
of the controller . . . . . 146
- E**
- echo . . . . . 71  
Edge echo . . . . . 61  
electric wheelchair . . . . . 434  
electrocardiograph . . . . . 520  
electromiogram (EMG) . . . . . 237  
electromyogram . . . . . 489  
electromyography . . . . . 482  
electron-beam-induced  
deposition . . . . . 597  
emergence . . . . . 271  
emergent behavior . . . . . 278  
EMG . . . . . 446  
endoscopy . . . . . 129  
entertainment and sport robots . 559  
environmental model uncertainty 374  
exoskeletal robotic orthosis . . 473  
exoskeleton . . . . . 482  
exoskeleton robot . . . . . 245  
experimental tests . . . . . 570
- F**
- FES. . . . . 446  
field emission . . . . . 597  
figure presentation . . . . . 622  
firm standing . . . . . 312  
fixed-structure robust H control 362  
flexible arm . . . . . 426  
flexible manipulator . . . . . 563  
flexible structure . . . . . 31  
floating unit . . . . . 613  
foot . . . . . 23  
force analysis . . . . . 473  
force measurement . . . . . 155  
force sensor-less . . . . . 613  
formation . . . . . 278  
functionally distributed control 217
- G**
- gain tuning . . . . . 54  
Genbu . . . . . 293  
genetic algorithm. . . . . 362  
gesture recognition . . . . . 17,420  
global positioning system . . . . . 333
- golf-swing robot . . . . . 355  
ground reaction force. . . . . 643
- H**
- H loop-shaping . . . . . 362  
H control. . . . . 426  
hand . . . . . 482  
hand impedance characteristics 635  
hand waving . . . . . 17  
handwriting robot . . . . . 381  
harmonic drive. . . . . 388  
heart rate counter . . . . . 520  
hoisting device. . . . . 464  
hopping robot . . . . . 319  
horse-type robot . . . . . 104  
human factors . . . . . 434  
human intention. . . . . 39  
human movements . . . . . 635  
human shoulder . . . . . 245  
hydrodynamic forces . . . . . 304  
hyper-redundancy. . . . . 1  
hyper performance . . . . . 559,570  
hysteresis . . . . . 388
- I**
- image processing . . . . . 80,200  
impedance ratio . . . . . 138  
impulsive sound. . . . . 39  
in-pipe corrosion . . . . . 71  
In-Pipe Corrosion . . . . . 61  
injection molding machine . . . 348  
input method . . . . . 420  
intelligent device unit. . . . . 208  
intelligent environment . . . . . 545  
intention detection . . . . . 545  
interface. . . . . 526  
interface board. . . . . 200  
internal force analysis . . . . . 489  
Internet . . . . . 626
- J**
- Jacobian matrix . . . . . 228  
jaw . . . . . 579  
joint impedance . . . . . 635  
jumping . . . . . 643  
jumping posture . . . . . 643
- L**
- laparoscopic surgery . . . . . 129  
laser . . . . . 97  
legged mobile manipulator . . . 312  
legged robot . . . . . 23

leg mechanism . . . . . 304  
 locomotion . . . . . 397  
 loose coupling . . . . . 626  
 lower back support . . . . . 489  
 lower leg . . . . . 643  
 Lyapunov function . . . . . 54

**M**

machine learning . . . . . 545  
 malignant brain tumor . . . . . 122  
 man-machine interface . . . . . 420  
 manipulators . . . . . 604  
 map building . . . . . 526  
 master-slave manipulator system 116  
 master slave manipulation . . . 146  
 McKibben artificial muscle . . . 504  
 measurement . . . . . 97,434  
 mechanical design . . . . . 473  
 mechanical gravity canceller. . . 563  
 mechanical safety . . . . . 473  
 mechatronics . . . . . 556  
 medical robot . . . . . 129  
 medical robotics . . . . . 513  
 microelectromechanical systems  
 (MEMS) . . . . . 163  
 microgravity . . . . . 319  
 micro manipulation . . . . . 163  
 minimally invasive surgery 129,513  
 mobile manipulator . . . . . 264  
 mobile platform . . . . . 456  
 mobile robot . . . . . 80,526  
 mobile robots . . . . . 44  
 modeling . . . . . 31  
 modular robot . . . . . 278  
 modular vector field control . . . 374  
 modulated vibration . . . . . 622  
 molding . . . . . 278  
 Molecular Dynamics . . . . . 271  
 motion assist. . . . . 446  
 motion assistance . . . . . 245  
 motion control . . . . . 228,346,355  
 motor . . . . . 327  
 mouth opening and closing  
 training . . . . . 579  
 multi-AC servomotor . . . . . 348  
 muscle suit . . . . . 504

**N**

nanorobotic manipulation . . . . 597  
 nanomanipulation . . . . . 155  
 navigation . . . . . 80  
 neural network . . . . . 138  
 neural networks . . . . . 90  
 nonlinear friction compensation 388  
 nonlinear observer . . . . . 388  
 nonlinear signal processing . . . 587  
 normalized evaluation index. . . 559

**O**

object location recognition . . . . 264  
 obstacle avoidance. . . . . 90  
 omni-directional vehicle. . . . . 404  
 online learning . . . . . 411  
 optimal design . . . . . 304  
 orthopedic surgery . . . . . 513  
 orthosis . . . . . 256

orthotics. . . . . 482  
 outdoor environment . . . . . 186

**P**

parallel/distributed control . . . . 217  
 parallel manipulators . . . . . 570  
 passive device . . . . . 256  
 pattern recognition . . . . . 186  
 PCI bus . . . . . 200  
 peg-in-hole . . . . . 613  
 perceptual system . . . . . 526  
 performance . . . . . 556  
 person with disabled legs . . . . . 456  
 physical representation . . . . . 559  
 physical therapy . . . . . 579  
 pico-Newton . . . . . 155  
 Pipe Diagnosis . . . . . 61  
 pipe diagnosis. . . . . 71  
 pneumatic . . . . . 8,163,497  
 pneumatic actuator . . . . . 256  
 pneumatic link . . . . . 286  
 pneumatics . . . . . 604  
 pneumatic servosystem . . . . . 362  
 position/image-based . . . . . 178  
 possibility of assistance. . . . . 473  
 posture space . . . . . 1  
 power-assisted lifter . . . . . 228  
 power assist . . . . . 504  
 power assist device. . . . . 489  
 power assisting device . . . . . 237  
 powered lower extremity orthosis 456  
 pressure control . . . . . 348

**Q**

quadruped robot . . . . . 104

**R**

range image . . . . . 420  
 range measurement. . . . . 333  
 real-time . . . . . 194  
 real-time posture control . . . . . 1  
 real-time system . . . . . 217  
 recognition of number of fingers 420  
 reconfigurable robot . . . . . 278  
 reduction gear . . . . . 327  
 redundancy resolution . . . . . 381  
 redundant robot . . . . . 381  
 redundant robots . . . . . 90  
 reinforcement learning . . . . . 526  
 remote book browsing . . . . . 264  
 remote center mechanism . . . . . 23  
 remote control . . . . . 8  
 remote medical system . . . . . 146  
 remote ultrasound diagnostic  
 system . . . . . 146  
 Responsive Link . . . . . 194  
 RMT . . . . . 194  
 robot . . . . . 54,346,374,579  
 robot arm . . . . . 8  
 robot communication . . . . . 626  
 robot controller . . . . . 200  
 robotic assembly . . . . . 613  
 robotics . . . . . 556  
 robotic surgery. . . . . 122  
 robot manipulator . . . . . 1  
 robot system. . . . . 208

robust control . . . . . 426  
 robustness . . . . . 178  
 rolling contact joint . . . . . 116  
 RT . . . . . 346  
 rubber muscle . . . . . 8,497  
 running machine . . . . . 304

**S**

sampling period. . . . . 54  
 scanning electron microscope . . 155  
 scattering . . . . . 97  
 search trajectory generation . . . 613  
 self-assisted care system . . . . 464  
 sensor fusion . . . . . 545  
 sensors . . . . . 208  
 sensory feedback. . . . . 381  
 Shepard tone. . . . . 535  
 shoeing . . . . . 17  
 simulator apparatus. . . . . 348  
 skill of golfer . . . . . 355  
 sliding mode. . . . . 587  
 SMA-Net Robot . . . . . 411  
 small humanoid robot. . . . . 208  
 snake-like robots . . . . . 293  
 SoC. . . . . 194  
 sole . . . . . 23  
 sonar-ring . . . . . 44  
 sound icon . . . . . 39  
 spinal cord injury . . . . . 482  
 spread spectrum . . . . . 333  
 spring. . . . . 104  
 stability . . . . . 54,90  
 stability on a manifold. . . . . 381  
 static/hand-eye . . . . . 178  
 stiffness . . . . . 446  
 stiffness analysis . . . . . 570  
 Stokesian Dynamics . . . . . 271  
 straight style transfer equipment 456  
 strain gage. . . . . 520  
 stuck avoidance . . . . . 293  
 Surface SH wave . . . . . 61  
 surgical tool . . . . . 116  
 swarm robot . . . . . 271  
 synchronous positioning control 348  
 systems . . . . . 346

**T**

tactile display . . . . . 622  
 tactile sensor. . . . . 622  
 tapping. . . . . 39  
 teaching . . . . . 446  
 teaching by showing. . . . . 80  
 telescopic crutch . . . . . 456  
 template matching . . . . . 186  
 temporomandibular joint disease 579  
 tendon . . . . . 104  
 torque planning . . . . . 355  
 tracking control . . . . . 404  
 trot . . . . . 104  
 two wheels caster type odometer 404

**U**

ultra-finished surface . . . . . 97  
 ultrasonic sound wave . . . . . 333  
 Ultrasonic testing . . . . . 61  
 ultrasonic testing . . . . . 71

ultrasonic wave sensor . . . . 587  
 underactuated manipulator . . . 563  
 upper limb motion . . . . . 504

**V**

variable impedance control . . . 146  
 vascular conditions . . . . . 138  
 velocity control . . . . . 348  
 vibration . . . . . 434  
 vibration control . . . . . 426

vision sensor . . . . . 31  
 visual camera . . . . . 17  
 visually impaired. . . . . 535  
 visual servoing. . . . . 178

**W**

wavelet analysis. . . . . 39  
 wavelet transform . . . . . 71  
 waving away . . . . . 17  
 wearable device . . . . . 464

wearable robot . . . . 256,497,504  
 wearable robotics. . . . . 237,489  
 Web Services . . . . . 626  
 whole-body motion. . . . . 355  
 wire-driven joint . . . . . 116  
 wire-driven parallel mechanism 228  
 workspace . . . . . 1

**Z**

ZMP . . . . . 312
