# Journal of Disaster Research

## AIMS & SCOPE

The *Journal of Disaster Research* publishes timely and topical articles on disaster risk reduction. The journal's wide and comprehensive scope covers natural and man-made disasters, such as geological disasters, meteorological disasters, hydrological and marine disasters, viral and other disaster-related disasters; lifeline disasters, transportation disasters, environmental disasters, food hygiene, nuclear disasters, terrorism, etc. Articles may offer a microscopic or macroscopic view on topics in basic/applied sciences, engineering, or explore the impacts of disaster on human society.

The journal's broad global audience includes anyone interested or involved in disaster risk reduction or improving disaster resilience, including researchers, engineers, disaster management specialists, administrators, policy makers, government agency employees, and personnel in not-for-profit or non-governmental organizations. Supported by a strong and diverse Editorial Board, the journal aims to provide rapid turnaround times for authors and vital information for readers.

Indexed in ESCI, SCOPUS,  
COMPENDEX (Ei)

## Call for Papers

### Paper submission:

Send the paper manuscript in PDF format to

[disaster@fujiypress.jp](mailto:disaster@fujiypress.jp)
