Guide to Prepare Figure Files for Printing

Please note the following points when you prepare figure files for printing.

➤ High-resolution images

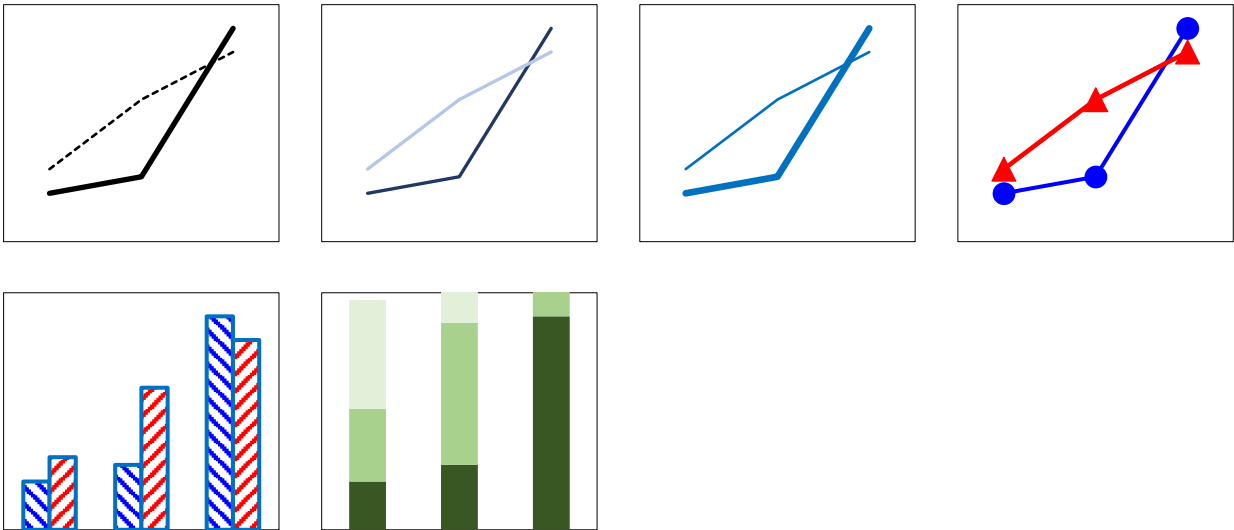

Please submit high-resolution images as possible, especially for JPG, PNG, and TIFF.

(More than/equal to 350 dpi/ppi in the printing size is recommended.)

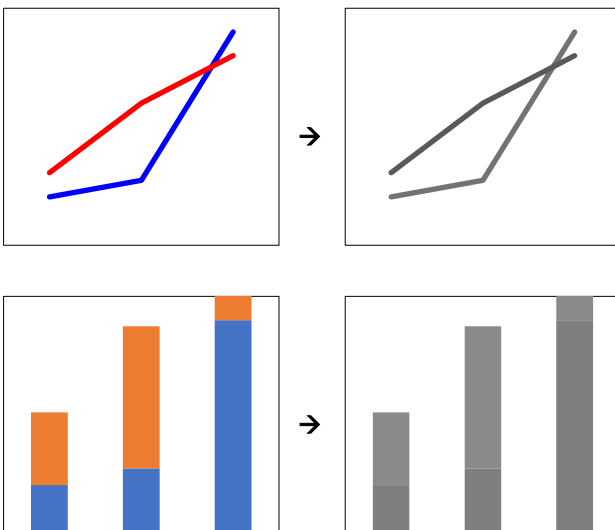

➤ For monochrome printing

If you don't apply a color printing option, please make figures recognizable in black-and-white.

[Good] Use patterns, marks, pale/dark, thin/thick, etc.

[Bad] *Converted in black-and-white, same depth colors are hard to be recognized (e.g., red and blue).
