

CALL FOR PAPERS

Journal of Robotics and Mechatronics

Special Issue on “Soft Mechanisms and Soft Elements”
Vol.37 No.1 (February 2025), Fuji Technology Press, Japan

Focus: Research has been ongoing on various types of soft robots in recent years. Soft robots with flexible mechanisms are expected to contribute greatly to the development of robotics, not only in industrial applications but also in various other applications, such as tasks involving robot-human interactions. Flexible mechanisms are not necessarily realized with flexible materials alone; they can also be realized by taking new approaches to conventional mechanisms. It is also desirable for sensors and various other components to be flexible so that they do not reduce the flexibility of a mechanism. The development of these mechanisms and elemental technologies will lead to the further development of soft robots. This special issue will feature papers on the structures and applications of soft mechanisms and soft elements, as well as on design and analysis methods and control techniques. We welcome many submissions so that we may contribute to the further development of soft robots.

Guest Editors: Daisuke SASAKI, Prof., Kagawa University, Japan
Taro NAKAMURA, Prof., Chuo University, Japan
Shuichi WAKIMOTO, Assoc. Prof., Okayama University, Japan

Editor: Masahiro TAKAIWA, Prof., Tokushima University Japan

Important Dates:

Submission deadline

Notification of acceptance/rejection

Final manuscript submission

Publication

July 20, 2024

November 20, 2024

December 20, 2024

February 20, 2025

Submission/Contact to:

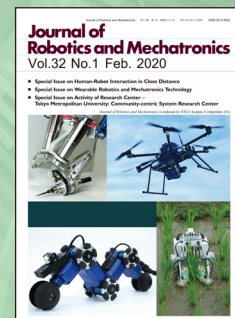

JRM Editorial Office, Fuji Technology Press, Japan: robot@fujipress.jp

- ◆ Papers should be submitted in Microsoft Word or PDF format. Details on submission and the journal are available at the following link: <https://www.fujipress.jp/jrm/>
- ◆ Submissions can be either Japanese or English. Submissions in Japanese will be translated by the publisher and used after being proofread by the author.
- ◆ Papers submitted to this special issue will undergo our usual review process. Paper may be published in general issues based on review results.
