

CALL FOR PAPERS

Journal of Robotics and Mechatronics

**Special Issue on “Education Based on
Practical Exercise on Sensing and Control”**
Vol.31 No.3 (June 2019), Fuji Technology Press, Japan

Focus: Control engineering and instrumentation engineering have significantly contributed to the improvement of industrial productivity, saving of resources and energy, and enrichment of our lives. They have become important cross-cutting study fields not only covering engineering but also having strong relations with the environment, society, and economy. Therefore, various studies have been conducted on the educational methods of related technologies at educational institutes and companies. With this background, we planned this special issue with the latest studies on the instruction and evaluation methods for education on control engineering, instrumentation engineering, and control technologies, expecting its contribution to further development in the future.
